There were two crews, of course, which did not try to row hard. The Nava Academy parsmen got their shells out of the railroad car in the morning and were in no condition to take a hard row.

The same was the case with George town, the Washingtonians being further hindered by delay in unloading launch Robert J. Collier from the rail road car in which it was packed.

Peansylvania's 'varsity crew was the first to go over the course for time. The freshmen carried them the early part of the journey and dropped then opposite the journey and dropped then opposite A. Crew Rows Evenly,

The Red and Blue 'varsity crew rowed very well and more evenly than usual The boat ran between strokes all right and the spacing was good. Just how fast the trial was Ellis Ward did not say. He appeared to be fairly well pleased with the results. The Quaker crew has been touted strong by Coach Rice, of Colum-bia, and by Coach Courtney, of Cornell. Ellis Ward does not seem to think that his crew is much.

There have been some changes in the order of the Annapolis oarsmen, but the same men are in the boat still. Coach Giendon was not particularly enthusiastic over the erew, aithough he said he hoped to show what they could do at four miles, as well as at two. From his general tone, it might be believed that his men were hardly expected to go a whole mile.

There have been some changes in the order the central board present.
